## HOW TO CITE RULES AND RSMo

**RULES**—Cite material in the *Missouri Register* by volume and page number, for example, Vol. 28, *Missouri Register*, page 27. The approved short form of citation is 28 MoReg 27.

The rules are codified in the *Code of State Regulations* in this system—

| Title      | Code of State Regulations | Division         | Chapter                | Rule                    |
|------------|---------------------------|------------------|------------------------|-------------------------|
| 1          | CSR                       | 10-              | 1.                     | 010                     |
| Department |                           | Agency, Division | General area regulated | Specific area regulated |

They are properly cited by using the full citation, i.e., 1 CSR 10-1.010.

Each department of state government is assigned a title. Each agency or division within the department is assigned a division number. The agency then groups its rules into general subject matter areas called chapters and specific areas called rules. Within a rule, the first breakdown is called a section and is designated as (1). Subsection is (A) with further breakdown into paragraph 1., subparagraph A., part (I), subpart (a), item I. and subitem a.

**RSMo**—The most recent version of the statute containing the section number and the date.

**R**ules appearing under this heading are filed under the authority granted by section 536.025, RSMo 2000. An emergency rule may be adopted by an agency if the agency finds that an immediate danger to the public health, safety or welfare, or a compelling governmental interest requires emergency action; follows procedures best calculated to assure fairness to all interested persons and parties under the circumstances; follows procedures which comply with the protections extended by the *Missouri* and the *United States Constitutions*; limits the scope of such rule to the circumstances creating an emergency and requiring emergency procedure, and at the time of or prior to the adoption of such rule files with the secretary of state the text of the rule together with the specific facts, reasons and findings which support its conclusion that there is an immediate danger to the public health, safety or welfare which can be met only through the adoption of such rule and its reasons for concluding that the procedure employed is fair to all interested persons and parties under the circumstances.

**R**ules filed as emergency rules may be effective not less than ten (10) days after filing or at such later date as may be specified in the rule and may be terminated at any time by the state agency by filing an order with the secretary of state fixing the date of such termination, which order shall be published by the secretary of state in the *Missouri Register* as soon as practicable.

**A**ll emergency rules must state the period during which they are in effect, and in no case can they be in effect more than one hundred eighty (180) calendar days or thirty (30) legislative days, whichever period is longer. Emergency rules are not renewable, although an agency may at any time adopt an identical rule under the normal rulemaking procedures.

## Title 10—DEPARTMENT OF NATURAL RESOURCES Division 20—Clean Water Commission Chapter 7—Water Quality

### EMERGENCY AMENDMENT

#### 10 CSR 20-7.050 [General] Methodology for Development of Impaired Waters List. The division is amending section (4).

*PURPOSE: This amendment incorporates by reference the detailed methodology for listing impaired waters. The emergency amendment will allow the state to complete the development of the 303(d) Impaired Waters List within the schedule mandated by the Environmental Protection Agency and meet the statutory requirement that the methodology be promulgated in accordance with Chapter 536, RSMo.*

*EMERGENCY STATEMENT: The Impaired Waters List identifies water throughout the state affected by pollution to the extent that the designated beneficial uses of the waters are unattainable. In some instances, the pollution is a current threat to public health. The list places priority on developing plans to promptly restore the quality of the affected waters. The state is required to produce a list April 1 of each even-numbered year. The Clean Water Commission finds a compelling governmental interest requiring this emergency action because the commission is now developing a proposed and final list of impaired waters pursuant to section 644.036, RSMo, effective August*

*28, 2006. An amendment to this rule is needed to accurately reflect the methodology or data used by the commission to develop the proposed list. The department is unable to request the commission's adoption of a list until the methodology used in developing the list is promulgated into rule. The urgency to move forward under an emergency amendment is necessary to allow the state to quickly begin plans to eliminate water pollution that threatens the public health. This emergency amendment will dissuade the Environmental Protection Agency from dictating a list to Missouri in order to address the state's delay in producing the list and the public health threat. The Clean Water Commission finds a compelling governmental interest requiring this emergency action because of the importance of submitting the list within the required time frame. The Clean Water Commission approved a methodology at the June 7, 2006, meeting after several stakeholder meetings and a sixty (60)-day comment period. The department is preparing a draft list of impaired waters based upon that methodology. A hearing will be held on the list at the January 9, 2007 commission meeting. The final list will be presented to the Clean Water Commission on March 7, 2007 and the Missouri Department of Natural Resources will request approval of the list at that meeting. The scope of this emergency amendment is limited to the circumstances creating the emergency and complies with the protections extended in the *Missouri* and *United States Constitutions*. The Clean Water Commission believes this emergency amendment is fair to all interested persons and parties under the circumstances. This emergency amendment filed October 16, 2006, effective October 26, 2006, expires April 23, 2007.*

*PUBLISHER'S NOTE: The secretary of state has determined that the publication of the entire text of the material which is incorporated by reference as a portion of this rule would be unduly cumbersome or expensive. This material as incorporated by reference in this rule shall be maintained by the agency at its headquarters and shall be made available to the public for inspection and copying at no more than the actual cost of reproduction. This note applies only to the reference material. The entire text of the rule is printed here.*

#### (4) Creation of the Proposed 303(d) List.

(A) The department shall develop a detailed methodology for identifying waters that are impaired and shall submit the methodology to public review prior to the development of an impaired waters list.
