

As defined in section 536.026, RSMo 2000 “an agency may solicit comments from the public on the subject matter of a rule that the agency is considering proposing. The agency may file a notice of the rule under consideration as a proposed rulemaking with the secretary of state for publication in the *Missouri Register* as soon as practicable after the filing thereof in the secretary’s office. The notice may contain the number and the subject matter of the rule as well as a statement indicating where, when, and how persons may comment.”

This section complies with this statutory requirement to publish rules being considered for proposal by an agency. These rules carry none of the weight of a proposed rule or amendment. Publishing a rule under consideration places no obligation on the agency to promulgate an actual rule in the future. Rules under consideration are reproduced in the format provided by the agency and are not subject to the secretary of state’s formatting requirements.

Following is the Text of Rules Under Consideration Submitted by the Department of Mental Health

**Title 9—DEPARTMENT OF MENTAL HEALTH
Division 45—Division of Mental Retardation and Developmental Disabilities
Chapter 5—Standards for Community Based Services**

RULE UNDER CONSIDERATION

9 CSR 45-5.120 Fire Safety for Individualized Supported Living and Residential Habilitation for One (1) to Three (3) People

PURPOSE: This rule establishes fire safety requirements for individualized supported living and residential habilitation homes providing support for one (1) to three (3) people funded through the Medicaid Home and Community Based Waiver.

(1) General Requirements.

(A) All individualized supported living and residential habilitation homes providing support for one (1) to three (3) people shall develop and have available for review at the home an evacuation plan in the case of fire or natural disaster. Each plan shall include evacuation routes and, in the case of fire, a pre-determined location outside of the home to which individuals are required to evacuate in order to avoid the fire.

(B) In homes where one (1) or more individuals receive twenty-four (24) hour support, the staff shall conduct at least three (3) fire drills and one (1) disaster drill annually. The required drills shall be conducted at least once per quarter, with a minimum of one drill per year conducted during the overnight hours when individuals may be sleeping. Overnight drills shall take into consideration the sleep patterns of individuals and be as unobtrusive to those sleep patterns as possible. If an individual needs to be carried out and participation in drills would put him/her at risk, staff may practice drills by substituting someone else for the individual. Such a drill shall be designed to be specific to the individual.

(C) In homes where all individuals receive less than twenty-four (24) hour support, the staff shall conduct at least one (1) fire drill and one (1) disaster drill annually. The required drills shall be conducted at least once every six (6) months.

(D) The drills required herein shall be conducted as follows:

1. Drills shall simulate an actual fire or disaster condition;
2. No one in the home shall obtain clothing or personal effects after the alarm has sounded;
3. Everyone shall remain at the evacuation site until the recall is issued or until they are dismissed;
4. The staff shall maintain a written record at the home of the date, type of drill, time required to evacuate the building and number of individuals present during the drill; and

5. Fire and disaster drills may be postponed during severe weather, but shall be rescheduled as soon as practical.

(E) House numbers shall be plainly visible from the street in case of emergency.

(F) Day-to-day fire safety considerations shall be observed. This includes but is not limited to: assuring exits are not blocked; safe storage of combustible materials; home is free from dangerous clutter that poses a fire hazard, or inhibits escape; extension cords shall be insulated, or power strips shall be used.

(G) Stairways, walks, ramps, and porches shall be kept free of ice and snow.

(H) At least one (1) portable and operable flashlight shall be located on each level of the home and accessible to staff and/or individuals in the event of power failure.

(I) The provider of residential services shall notify the nearest fire department that the facility is in operation and have required signed documentation (fire department notification form) on file at the home if any individual in the home has any difficulty that would impede evacuation during a fire, e.g. use of wheelchair.

(J) The provider shall, as soon as practical, report any fire in the home to the fire safety authority having jurisdiction and to the local regional center director.

(K) Homes served by a volunteer or membership fire department shall be a member in good standing with the fire department. A copy of the membership or receipt for membership shall be on file at the home and available for review.

(L) Homes shall appear to be safe and sanitary and have met local fire and safety codes, if applicable. This can be verified by viewing a copy, provided by the landlord, if applicable, inspections and/or licenses, or by requesting an inspection by local city/county inspector, or fire department, if available.

(M) The Regional Center may make additional requirements that provide adequate life safety protection if it is determined that the safety of individuals is endangered.

(2) Means of Escape Requirements.

(A) Each living area and sleeping room shall have two (2) means of escape.

(B) Doors and windows shall not be locked from the outside or in any manner that would prevent evacuation when the building is occupied. The window(s) designated as a means of escape shall be operable from the inside without the use of tools and shall provide a clear opening to allow rescue by fire department workers, if necessary. The windows shall be accessible by the fire department and shall open into an area having access to a public way. (Exception: Existing structures approved prior to the date of this rule may submit an alternate plan of escape, (ex: ladders), or approval of the fire department having jurisdiction.)

(C) No dead-bolt locks that require a key to unlock the lock from the inside shall be allowed.

(D) All ramps shall have a slip resistant surface and shall be designed so that water or snow shall not accumulate on their surface.

(3) Interior Finish.

(A) Interior finish shall be approved by the local fire department or local authorities if applicable to assure local requirements are met.

(4) Detection, Alarms, Extinguishment.

(A) One (1) A-B-C type fire extinguisher shall be located in or near the kitchen. Additional fire extinguishers shall be placed on each level of the home. Each fire extinguisher shall have either an expiration date or preventive maintenance tag, and indicator of charge.

(B) Fire extinguishers shall be maintained according to the manufacturer's instructions and be in good operating condition.

(C) Smoke detectors shall be installed in all hallways giving access to sleeping rooms. Smoke detectors shall be in good operating condition and functional. All smoke detectors that are ten (10) years old or older shall be replaced with new smoke detectors.

(D) Homes using appliances that pose a potential carbon monoxide risk (i.e. gas fired stoves, water heaters, and furnaces, or homes with attached garages) shall install a carbon monoxide detector that is in good operating condition, and functional.

1. If an elevated carbon monoxide level is detected, the home shall have all gas-fired appliances checked by the appropriate local utility company to identify the source of the carbon monoxide, and must have documentation verifying that the source was checked by a licensed heating and cooling company and is in safe working order. The regional center shall be notified within forty-eight (48) hours.

2. If a level of carbon monoxide is determined that endangers the occupants, i.e. persons are experiencing symptoms of carbon monoxide poisoning, the provider shall take measures necessary to protect the occupants. This may include evacuation of the building. They shall contact the local fire department to inspect for safety, and re-enter the home only when it is aired out, and the problem corrected. The provider shall obtain and have on file at the home, documentation from a licensed heating and cooling company that the determined source is in safe working order. The regional center shall be notified as soon as practical, once people are safe and the appropriate emergency action has been taken.

(5) Heating, Ventilating, Air Conditioning, and Mechanical Equipment.

(A) Un-vented fuel-fired room heaters, portable electric space heaters and floor furnaces shall not be permitted for use.

(B) No home shall be allowed to heat the home with a wood burning stove, fireplace, or wood burning furnace located inside of the structure as a primary source of heat. Fireplaces need to be approved for use by the local fire department. Written approval by the local fire department must be on file in the home.

(C) Clothes dryers shall be vented and maintained properly.

(6) Equivalency Concepts. Nothing in this rule is intended to prevent the use of systems, methods, or devices of equivalent or superior quality, strength, fire resistance, effectiveness, durability, and safety as alternatives.

If granted, the SPE Certificates will authorize these individuals to qualify as drivers of commercial motor vehicles (CMVs), in intrastate commerce only, without meeting the vision standard prescribed in 49 CFR 391.41(b)(10), if applicable, or the diabetes standard prescribed in 49 CFR 391.41(b)(3).

SUPPLEMENTARY INFORMATION:

Public Participation

If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard.

Background

The individuals listed in this notice have recently filed applications requesting MoDOT to issue SPE Certificates to exempt them from the physical qualification requirements relating to vision in 49 CFR 391.41(b)(10), or to diabetes in 49 CFR 391.41(b)(3), which otherwise apply to drivers of CMVs in Missouri intrastate commerce.

Under section 622.555, *Missouri Revised Statutes* (RSMo) Supp. 2005, MoDOT may issue a Skill Performance Evaluation Certificate, for not more than a two (2)-year period, if it finds that the applicant has the ability, while operating CMVs, to maintain a level of safety that is equivalent to or greater than the driver qualification standards of 49 CFR 391.41. Upon application, MoDOT may renew an exemption upon expiration.

Accordingly, the agency will evaluate the qualifications of each applicant to determine whether issuing a SPE Certificate will comply with the statutory requirements and will achieve the required level of safety. If granted, the SPE Certificate is only applicable to intrastate transportation wholly within Missouri.
