(1) General.

(A) The case study course is an educational offering which shall be designed to investigate the intellectual development and practical application of constructing and reporting a real property appraisal. Any such course shall include both classroom and on-site instruction and experience, including the passage of a final examination for pre-licensure education credit, and the submission of one (1) or more acceptable appraisal reports for experience credit.

(B) Case study courses shall be at least thirty (30) hours of instruction. For each case study course, experience credit hours may not exceed three (3) times the education credit granted, and in no event shall the experience credit granted for a single course exceed ninety (90) hours. An applicant for licensure or certification may receive thirty (30) hours of pre-licensure education credit upon passage of an examination approved by the Appraiser Qualifications Board (AQB) course approval program or by an alternate method established by the AQB. A licensee may receive twenty-eight (28) hours of continuing education credit for a case study course as allowed pursuant to 20 CSR 2245-8.010. An applicant for licensure or certification will receive the experience credit upon completing one (1) or more Uniform Standards of Professional Appraisal Practice (USPAP) compliant appraisal reports for the course. The USPAP, 2008 Edition, is incorporated herein by reference and can be obtained from The Appraisal Foundation, 1155 15th Street NW, Suite 1111, Washington, DC 20005, by calling (202) 347-7722, or at www.appraisalfoundation.org. This rule

does not incorporate any subsequent amendments or additions to the USPAP. The amount of education and experience credit available from a case study course will be determined at the time it is approved by the AQB course approval program or by an alternate method established by the AQB.

(C) A course provider may offer case study courses in the following areas:

1. Residential, including but not limited to, single family, modular, condominium, two (2) to four (4) family residential, manufactured, and other unique residences;

2. Commercial, including but not limited to, the following uses: office, retail, shopping center, hotel or motel, convenience store, restaurant, apartments (five (5) or more units), subdivisions, or any combination thereof;

3. Industrial, including but not limited to, warehouses;

4. Special uses, including but not limited to, houses of worship;

5. Agricultural, including but not limited to, farms (row crop and/or pasture), and timberland;

6. Review appraisals in any of the areas listed above in this subsection;

7. Appraisal consulting, including but not limited to, feasibility studies or marketability studies in any of the areas listed above in this subsection;

8. Appraisal management, including but not limited to, 1) supervisory appraiser responsibilities, functions and liabilities, and 2) management of an appraisal office including but not limited to staff management and supervision, databank, and plant set-up;

9. Miscellaneous, including but not limited to, condemnation appraisals in any of the areas listed above in this subsection; and

10. Any other area approved by the AQB.

(D) A case study course shall require completion of one (1) or more appraisal reports of the type of property to which the course pertains. The appraisal report(s) may value any real property interest, including, but not limited to, fee simple, leased-fee, leasehold, sub-leasehold, fractional interest, physical segment or partial holding. Personal property and business valuation issues shall be addressed if related to the appraisal of real property, but shall not be the primary focus of the course.

(E) The provider shall assure that the course includes review of the appraisal process, including an in-depth review of the methods and techniques used in the three (3) approaches that pertain to the type of property appraised and the development and reporting requirements of the USPAP. The instruc-

tion regarding USPAP principles should include, at a minimum, discussion regarding the scope of work, the type of report used (self-contained, summary, restricted-use, or oral) and the other specific methods and techniques required in the report. Other appraisal report preparation issues that shall be discussed in the course include report format (narrative or form), grammar and syntax issues, quality control, and details relating to pertinent addendum for the type of property or report. The instructor or other approved USPAP reviewer shall be available to answer questions from and provide input to the students as to the deficiencies in the submitted appraisal report(s).

(F) A case study course shall include substantial time with the instructor in the field as well as in classroom instruction. The case study course shall include the following for each appraisal report completed, if applicable: inspect the subject property and neighborhood, view and photograph the comparable sales and rental properties used in the three (3) approaches, research and analyze data to apply the three (3) approaches to value, and reconcile the estimated values from each valuation approach to develop a final value opinion. The class may visit the courthouse, use data accessible via the Internet (multiple listing service (MLS), sales/listings, public information, demographic websites, etc.), and other sources, to collect the necessary data to perform the appraisal. To obtain experience credit from the course, an applicant for certification or licensure shall write a USPAP compliant appraisal report(s) reviewed and found acceptable by the course instructor or other approved USPAP reviewer. Before experience credit will be granted to an applicant for certification or licensure, the instructor or other approved USPAP reviewer shall certify to the commission that the appraisal report(s) required for the case study course is compliant with USPAP.
